

BRIAN YAN

Software Engineer

 brian.yan.46@gmail.com  New York, NY  [brianyan.com](https://github.com/briantotheyanyan)  github.com/briantotheyanyan

EXPERIENCE

Software Engineer

Facebook

 May 2021 – Present  New York, NY

- Helping to give users more control over the content that is on their News Feed, while re-prioritizing News Feed content towards metrics measuring sentiment, rather than traditional engagement metrics.

Software Engineer II

Microsoft

 August 2017 – March 2021  Redmond, WA

- Built the infrastructure that will allow Azure to optimally place VMs hosted on Microsoft Azure.
- Horizontally scaled Azure to support higher customer load than was previously possible by leveraging .Net, C#, Service Fabric and Kafka

Software Engineering Intern

Google

 May 2016 – August 2016  Mountain View, CA

- Enabled engineers to easily parse data on App Deeplinking by Developing internal UX tools as a member of the Apps and Product Infrastructure team

Software Engineering Intern

Viacom

 June 2015 – August 2015  New York, NY

- Prototyped and developed experimental iOS apps and Chrome Extensions focused on long term growth in cross-platform content and storytelling.

PROJECTS

Simon Says

Top 6 at Android TV Hackathon

 Spring 2015  Los Angeles, CA

- Android TV application that detects user movements using Myo.
- Intended to assist with physical therapy by recording data for doctors.

InDoors

Released on the Chrome Extension Store

 Winter 2015  New York, NY

- Chrome Extension that edits LinkedIn Searches to include Glassdoor ratings of employers. Currently on the Chrome Extension store.
